

A Project Report On

“ WATCHIFY ”

WATCH COLLECTION WEBSITE

SUBMITTED TO :

Geetanjali College of Computer Science and Commerce
(BBA) Saurashtra University Rajkot

SUBMITTED BY :

RAMANI BRIJESH ASHOKBHAI

BCA Semester – 5

PROJECT GUIDE :

Prof. NIRAV THAKAR

ACADEMIC YEAR :

2026-27

Acknowledgement

- I am happy to submit my project "Watchify – Watch Collection Website" to Saurashtra University for the BCA degree in the Computer branch.
- I am also grateful to Prof. Brijesh Shah Head of the Department, and all the faculty members of the Department of Computer Science for their kind support throughout this journey.
- I take the privilege to acknowledge the authors of the numerous books, papers and blogs which I referred to during the progress of this project.
- I also say a big thank you to my parents for their constant support. Without them I could do nothing, not only in this project but also in life. I am thankful to my family for their support.
- The feeling of gratefulness for anyone's help arises directly from the bottom of the heart. A small but important and timely help can prove to be a milestone in one's life.
- I am very thankful to Almighty God for giving me such wonderful people and everything I needed, even before I asked for it.

Project Profile

Project Title	Watchify – Watch Collection Website
Development Software	VS Code, XAMPP, phpMyAdmin
Front End	HTML5, CSS3, Bootstrap 5, JavaScript
Back End	PHP 8 (PDO)
Database	MySQL
Academic Year	2026-27
Developed By	Brijesh Ramani
Submitted To	Geetanjali College of Computer Science and Commerce (BBA) Saurashtra University Rajkot
Documentation Tool	Microsoft Word
Operating System	Any OS with a web browser (Windows, Android, iOS, Linux)
Language	PHP, HTML, CSS, JavaScript, SQL

System Development Life Cycle

- For the development of this project I have followed the simple Waterfall Model of SDLC.
- The Waterfall Model was the first process model to be introduced. It is also referred to as a linear-sequential life cycle model. It is very simple to understand and use. In a Waterfall Model, each phase must be completed before the next phase can begin and there is no overlapping in the phases.
- The Waterfall Model illustrates the software development process in a linear sequential flow. This means that any phase in the development process begins only if the previous phase is complete.

❖ Steps :

1. Requirement Gathering
2. Project Planning
3. Design
4. Coding & Implementation
5. Testing

1 - Requirement Gathering

- Requirement gathering is the first stage of any software development process. After choosing the project topic, every criterion needed to build that specific project must be researched.
- I began gathering requirements for my watch shopping website by studying popular e-commerce websites such as Amazon, Flipkart and Titan, to understand the functionality needed in an online shop and the layout used for product listing, cart and checkout.

❖ **Features needed in the application for Customer (User Side)**

1. **Registration & Login** : A customer can create an account with name, email, phone and password and log in securely.
2. **Browse Watches** : Watches can be browsed by Category (Men, Women, Kids, Couple) and by Brand (Rolex, Casio, Omega, Fossil, Titan).
3. **Shop with Filters** : The Shop page allows searching by name, filtering by brand, category and price range, and sorting by newest, price and name.
4. **Product Details** : Shows image, price, old price, description, stock availability and related watches.
5. **Cart** : Customer can add watches, change quantity and remove items. The total updates instantly when the quantity changes.
6. **Checkout (Cash on Delivery)** : The customer confirms the shipping address and places the order. Payment is Cash on Delivery only.
7. **Profile & Order Tracking** : Customer can update profile, change password, view order history and track the status of every order.

❖ **Features needed in the application for Admin :**

1. **Dashboard** : Shows total products, brands, orders and users, total revenue, order status summary and the recent orders.
2. **Product Management** : Add, edit and delete products, including image upload using the "Choose File" button, price, stock, featured and active/inactive status.
3. **Brand Management** : Add, edit, search and delete brands.
4. **Category Management** : Add, edit, search and delete categories.

5. **Order Management** : View and search orders, update status (Pending, Processing, Shipped, Delivered, Cancelled) and delete orders. Stock is reduced automatically when an order is marked Delivered.
6. **User Management** : View registered customers, search and delete users.

2 - Project Planning

- After the requirement collection phase is completed, a project plan is made. The number of project modules must be determined and the most suitable technology for development must be selected.
- The user interface of the whole project is created with HTML, CSS and Bootstrap 5 (responsive layout), and JavaScript is used for interactive behaviour such as the live cart total, scroll animations and image preview during upload.
- PHP is used on the server side for all operations such as registration, login, cart handling, order placement and the admin panel. MySQL is used as the back end database, and all data is accessed using PDO prepared statements.
- The same application contains both the Customer side (root folder) and the Admin side (admin folder), and both use the same MySQL database.

3 - Design

- This phase can be broken down into two parts: the preliminary design and the final design. The basic layout of the project is generated on paper or using a design program during the preliminary design phase, and its viability is then evaluated.

- The second part is the final design, in which the final or nearly accurate design of the project is constructed after earlier concepts have been evaluated for practicality and flaws have been identified. A modern Teal / Amber / Charcoal colour theme and a responsive layout were chosen for Watchify.

4 - Coding & Implementation

- The actual application is coded in the chosen programming language after the collection of all requirements, approval of the design and feasibility assessment of the project. This is the longest phase of the SDLC. For development I selected Visual Studio Code as the editor and XAMPP (Apache + MySQL + PHP) as the local server.

❖ Coding Standard :

1. Common functions (database connection, escaping, URL helper, rupee format, CSRF and login checks) are written once in config/config.php and reused in every page.
2. Repeated page parts such as header, footer and product card are kept in the partials folder.
3. File names are in lowercase and words are separated by underscore (for example order_view.php, product_card.php).
4. Every database query uses PDO prepared statements to avoid SQL injection.
5. All output is escaped with the e() function and every form contains a CSRF token.
6. Passwords are never stored as plain text; they are stored using password_hash().

❖ **The application development is divided into two phases :**

1. Database Making : The database is made based on the design. A MySQL database named "watchify" with 7 tables is created and the 80 sample products, 5 brands, 4 categories and the default admin are inserted using the SQL file.

2. Application Development : This phase translates the result of the design into PHP pages for the customer side and the admin panel.

❖ **Project Structure :**

Folder / File	Purpose
index.php, shop.php, category.php, brand.php	Home page, product listing with filters, category and brand pages
product.php, cart.php, checkout.php	Product details, shopping cart and order placement
login.php, register.php, logout.php, profile.php	Customer authentication and profile management
order_view.php, about.php	Single order details with status tracking, About Us page
admin/	Admin panel: login, dashboard, products, brands, categories, orders, users
config/config.php	Database connection and helper functions
partials/	Reusable header, footer and product card
assets/	CSS, JavaScript, images and uploaded product images
database/watchify.sql	Database structure and sample data

5 - Testing

- After the coding and implementation phases are complete, the application is ready to be tested for usability and to see whether it is operating as planned.
- For testing purposes, the website was tested on different browsers and screen sizes and shared with friends and colleagues to verify its functions and user friendliness. Until the application functions as intended, this SDLC process repeats itself from the first step to the last.

System Requirement Specifications

- To develop and run this project, the following hardware and software are required :

❖ Minimum Hardware Requirement :

- For Development / Local Server :

Operating System	Windows 7 / 10 or higher
CPU / Processor	Intel i3
RAM	4 GB

- For Customer and Admin (Browser) :

Operating System	Any (Windows / Android / iOS / Linux)
Device	Mobile, Tablet, Laptop or Desktop
Browser	Chrome, Edge, Firefox or Safari (latest)

❖ Software Requirements :

Server Package	XAMPP (Apache, MySQL / MariaDB)
PHP Version	PHP 8.0 or higher
Database Tool	phpMyAdmin
Editor	Visual Studio Code
Libraries (CDN)	Bootstrap 5.3.3, Bootstrap Icons 1.11.3, Google Fonts
Internet	Required for CDN libraries and product images

About The Tools & Technologies

PHP :

- In this project MySQL stores brands, categories, products, users, admins, orders and order items. Relationships between tables are maintained with primary keys and foreign keys.

HTML, CSS and JavaScript :

- HTML is used to structure the web pages, CSS is used for styling and layout, and JavaScript adds interactivity in the browser. In Watchify, JavaScript is used for the live cart total, scroll reveal animation and the image preview while uploading a product image.

Bootstrap 5 :

- Bootstrap is a free front-end framework that provides a responsive grid system and ready-made components such as navbar, cards, forms, buttons and modals. It makes the website look good on mobile, tablet and desktop screens.

PDO (PHP Data Objects) :

- PDO is a database access layer of PHP. It supports prepared statements, which separate SQL code from user data and protect the application from SQL injection attacks. All queries of Watchify are executed through PDO.

XAMPP :

- XAMPP is a free, open-source package that contains the Apache web server, MariaDB / MySQL, PHP and Perl. X stands for cross-platform. It allows a website to be built and tested on a local computer before it is uploaded to a live server.

phpMyAdmin :

- phpMyAdmin is a web-based tool to manage MySQL databases. It is used to create the database and import the watchify.sql file.

Visual Studio Code :

- Visual Studio Code is a lightweight, free source-code editor from Microsoft that supports many programming languages. It provides syntax highlighting, IntelliSense, code folding and a large marketplace of extensions. It was used to write all PHP, CSS and JavaScript code.

Microsoft Word :

- MS Word is used to create documents such as write-ups, resumes, contracts and reports. It is one of the most commonly used programs of the Office suite and was used to prepare this project report.

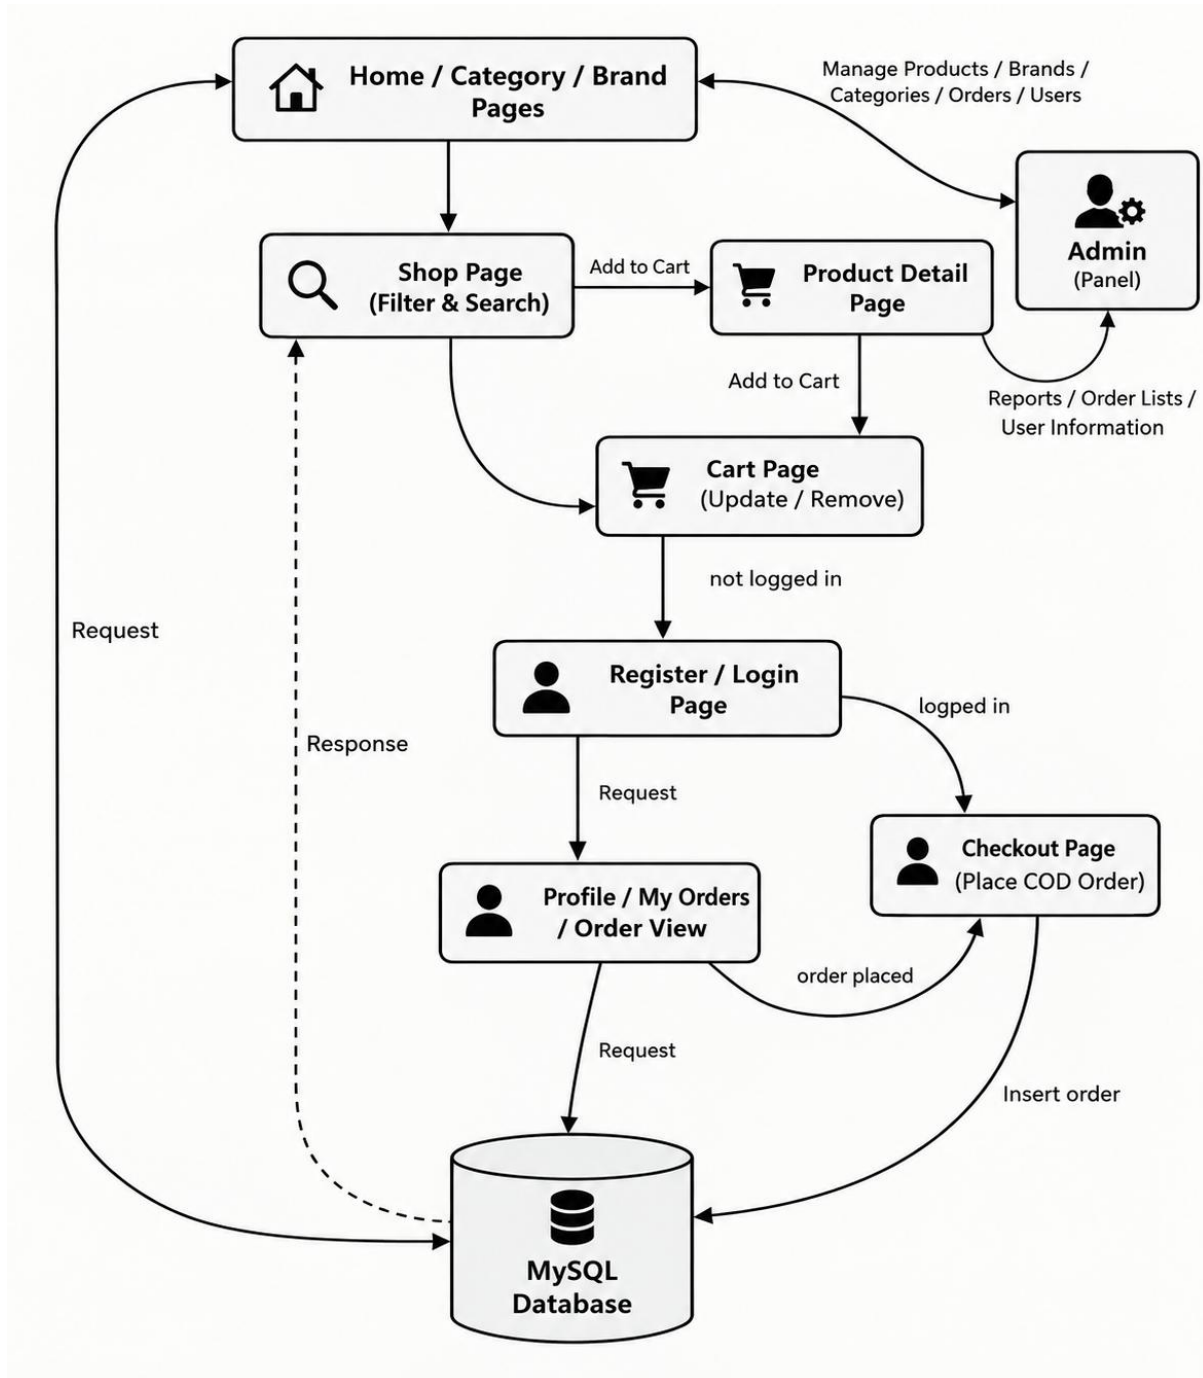

Data Flow Diagram

Context Level Diagram :

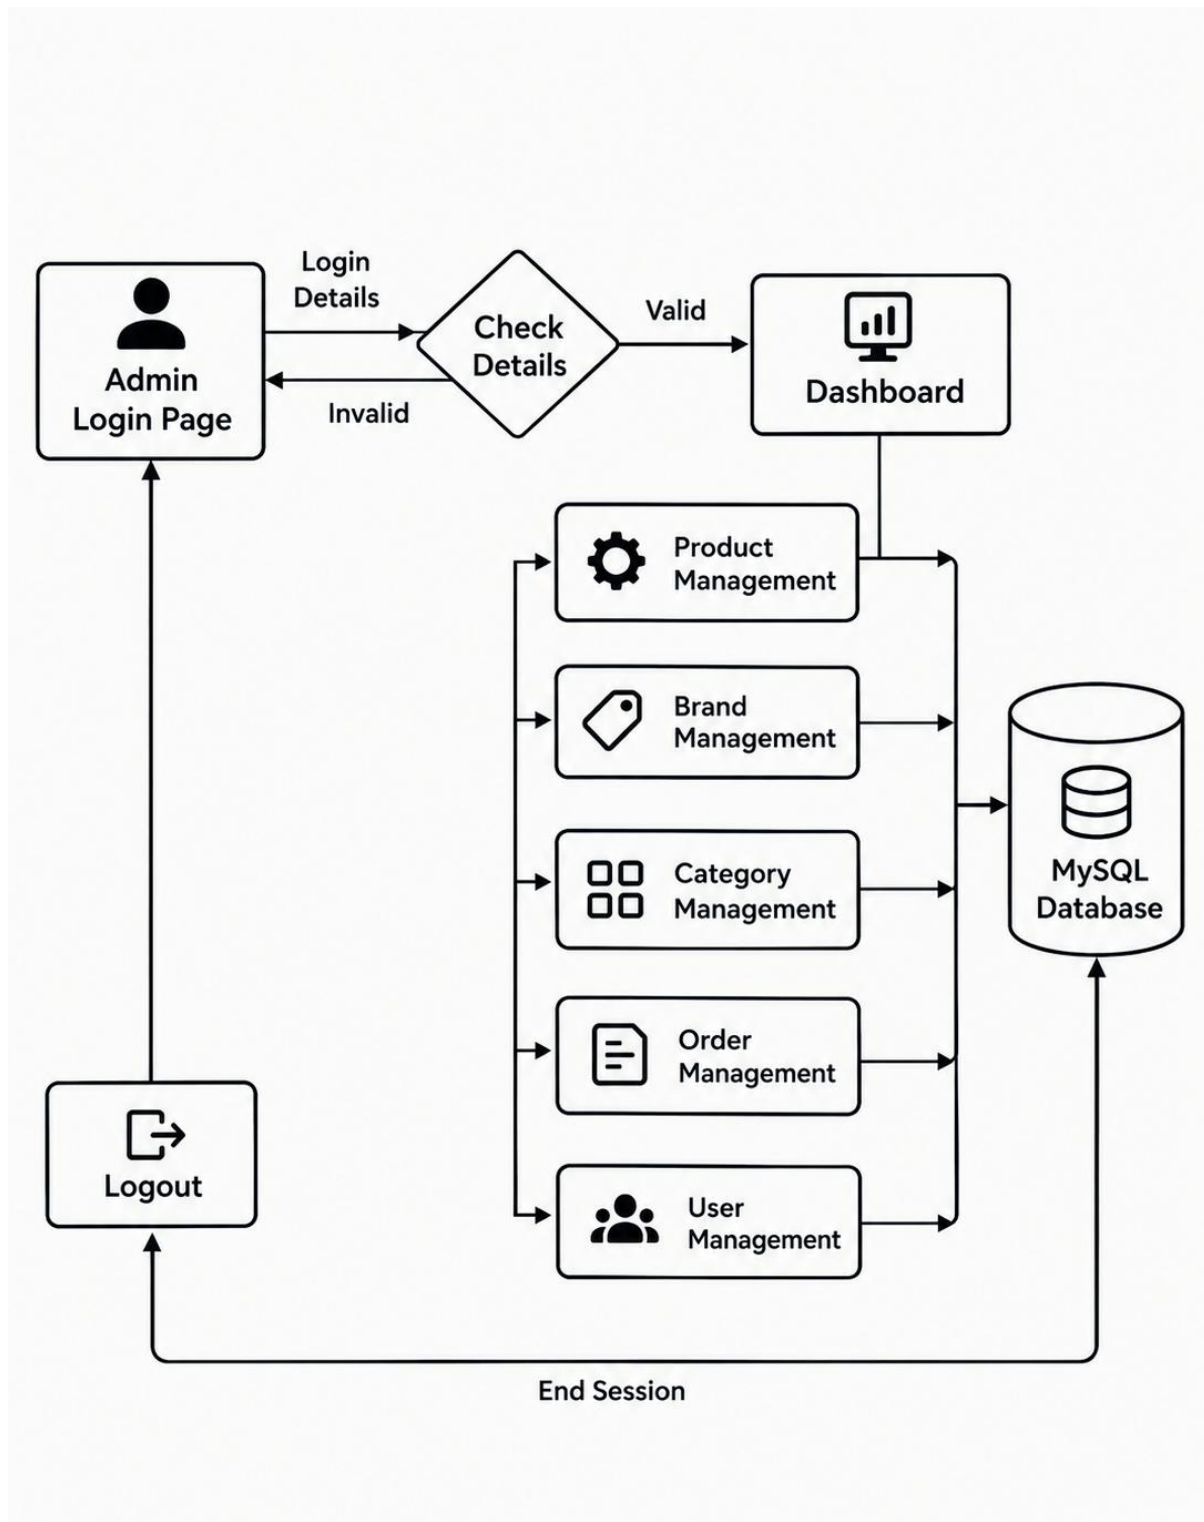

Context Level Diagram

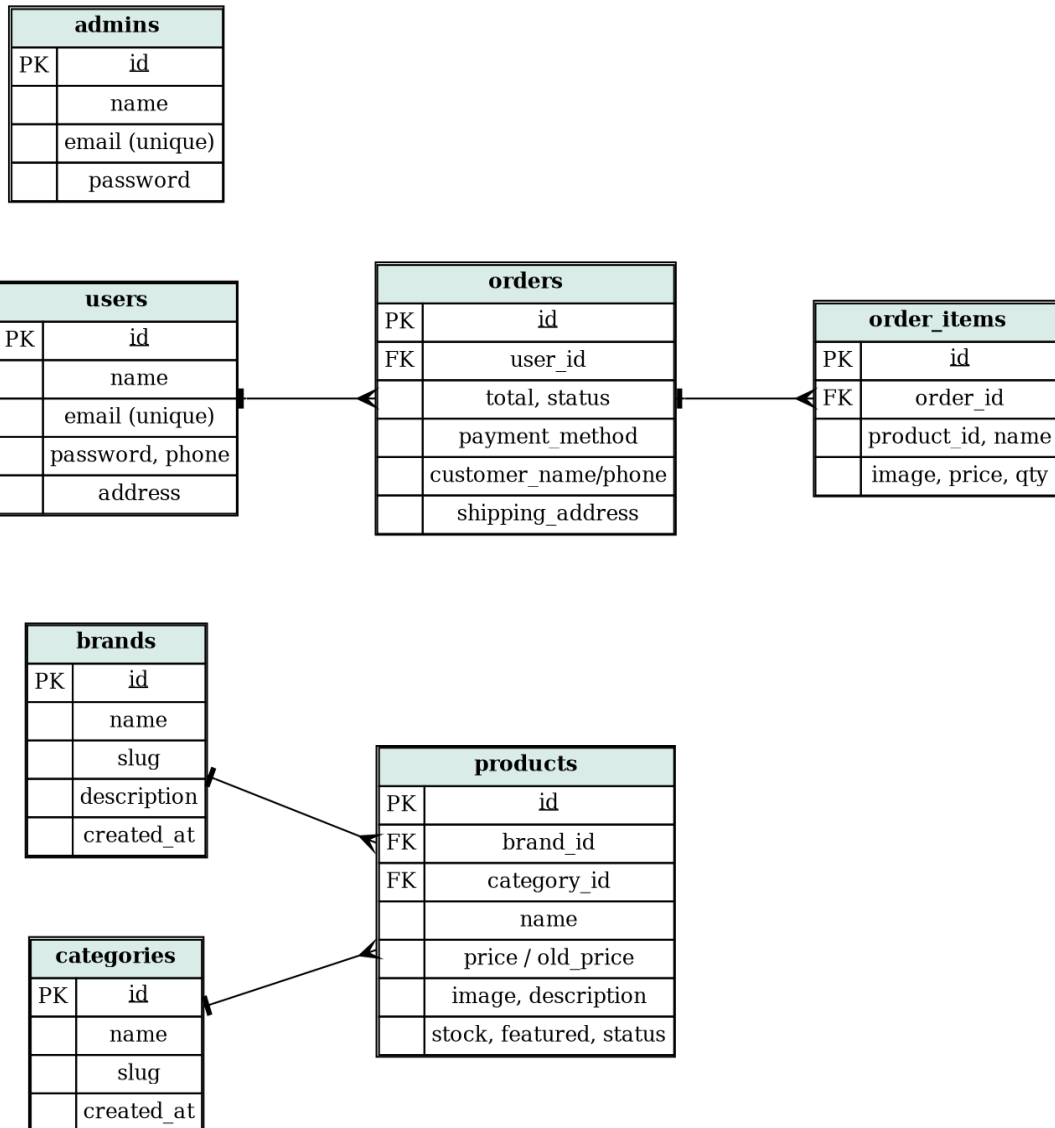

❖ User side :

❖ Admin side

Entity Relationship Diagram

Relationships : One Brand has many Products, one Category has many Products, one User places many Orders, and one Order contains many Order Items. The admins table is used only for admin login.

Data Dictionary

brands Table :

Sr no	Field	Data Type	Size	Constraint
1	id	INT	11	Primary Key, Auto Increment
2	name	VARCHAR	100	Not Null
3	slug	VARCHAR	120	Unique
4	description	TEXT	-	Null allowed
5	created_at	TIMESTAMP	-	Default current time

categories Table :

Sr no	Field	Data Type	Size	Constraint
1	id	INT	11	Primary Key, Auto Increment
2	name	VARCHAR	100	Not Null
3	slug	VARCHAR	120	Unique
4	created_at	TIMESTAMP	-	Default current time

products Table :

Sr no	Field	Data Type	Size	Constraint
1	Id	INT	11	Primary Key, Auto Increment
2	Name	VARCHAR	150	Not Null
3	brand_id	INT	11	Foreign Key (brands.id)
4	category_id	INT	11	Foreign Key (categories.id)
5	Price	DECIMAL	10,2	Not Null
6	old_price	DECIMAL	10,2	Null allowed

Sr no	Field	Data Type	Size	Constraint
7	Image	VARCHAR	255	Null allowed
8	description	TEXT	-	Null allowed
9	Stock	INT	11	Default 0
10	featured	TINYINT	1	Default 0
11	Status	ENUM	active / inactive	Default active
12	created_at	TIMESTAMP	-	Default current time

users Table :

Sr no	Field	Data Type	Size	Constraint
1	Id	INT	11	Primary Key, Auto Increment
2	Name	VARCHAR	120	Not Null
3	Email	VARCHAR	150	Unique
4	password	VARCHAR	255	Not Null (hashed)
5	phone	VARCHAR	30	Not Null
6	address	TEXT	-	Null allowed
7	created_at	TIMESTAMP	-	Default current time

admins Table :

Sr no	Field	Data Type	Size	Constraint
1	id	INT	11	Primary Key, Auto Increment
2	name	VARCHAR	120	Not Null
3	email	VARCHAR	150	Unique
4	password	VARCHAR	255	Not Null (hashed)
5	created_at	TIMESTAMP	-	Default current time

orders Table :

Sr no	Field	Data Type	Size	Constraint
1	id	INT	11	Primary Key, Auto Increment
2	user_id	INT	11	Foreign Key (users.id)
3	total	DECIMAL	10,2	Not Null
4	status	VARCHAR	30	Default Pending
5	payment_method	VARCHAR	30	Default Cash on Delivery
6	customer_name	VARCHAR	120	Null allowed
7	customer_phone	VARCHAR	30	Null allowed
8	shipping_address	TEXT	-	Null allowed
9	created_at	TIMESTAMP	-	Default current time

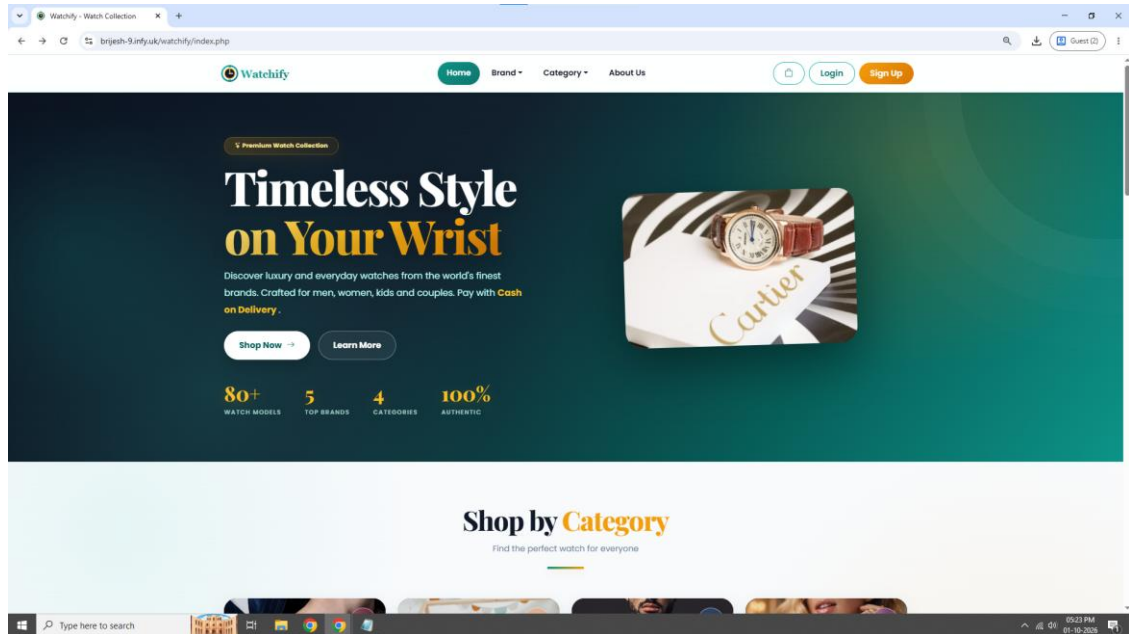

order_items Table :

Sr no	Field	Data Type	Size	Constraint
1	id	INT	11	Primary Key, Auto Increment
2	order_id	INT	11	Foreign Key (orders.id)
3	product_id	INT	11	Product reference
4	name	VARCHAR	150	Not Null
5	image	VARCHAR	255	Null allowed
6	price	DECIMAL	10,2	Not Null
7	qty	INT	11	Default 1

Screen Shots

❖ User Side Screens :

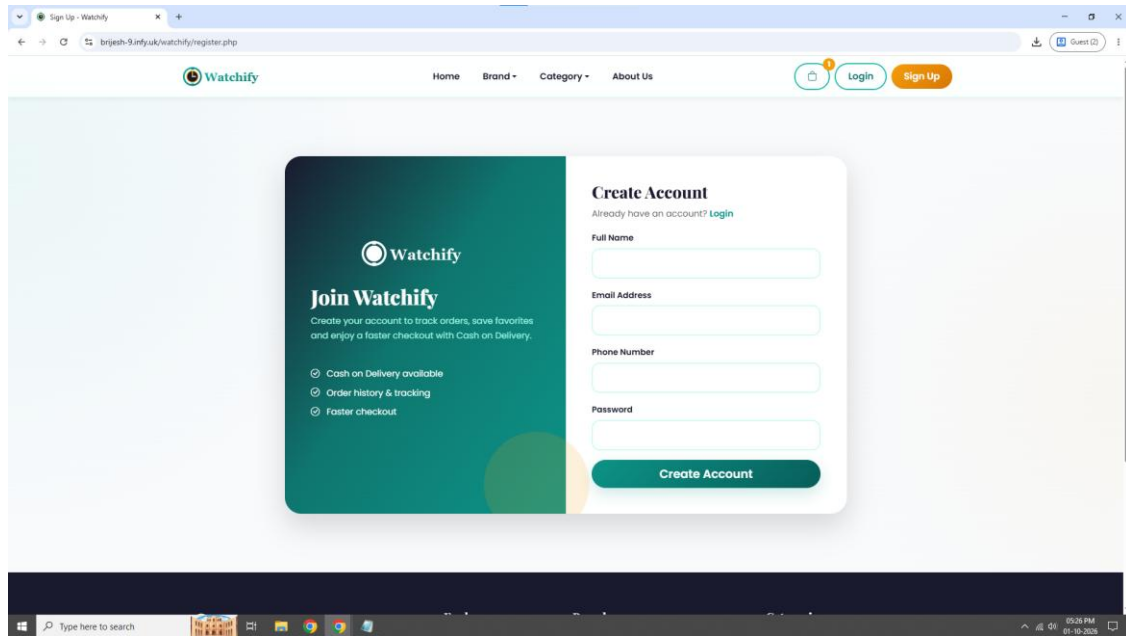

1 - Home Screen :

❖ Description :

- It is the first screen of the website with a hero banner, shop by category, featured watches, brands and Cash on Delivery information.
- The customer can click a category, brand or watch to open the related page.
- The customer can click a Login , Sign up or cart button to open related page.

2 – Register Screen :

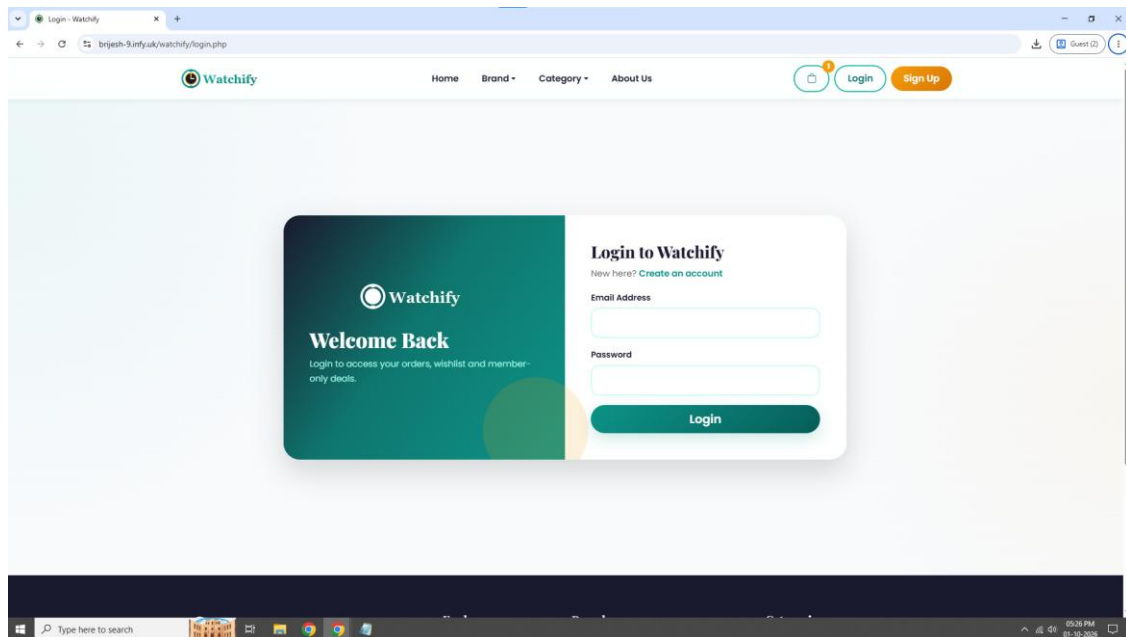

The screenshot shows a web browser window with the URL `brijesh-9.info.uk/watchify/register.php`. The page features a navigation bar with links for Home, Brand, Category, and About Us, along with Login and Sign Up buttons. The main content area displays a 'Join Watchify' section with a green background and a 'Create Account' form. The 'Join Watchify' section includes the Watchify logo, a heading, a description, and three bullet points: 'Cash on Delivery available', 'Order history & tracking', and 'Faster checkout'. The 'Create Account' form has fields for Full Name, Email Address, Phone Number, and Password, followed by a 'Create Account' button. A 'Guest' button is also visible in the top right corner.

❖ Description :

- A new customer creates an account to enter name, email, phone and password.
- Customer Register in web site .

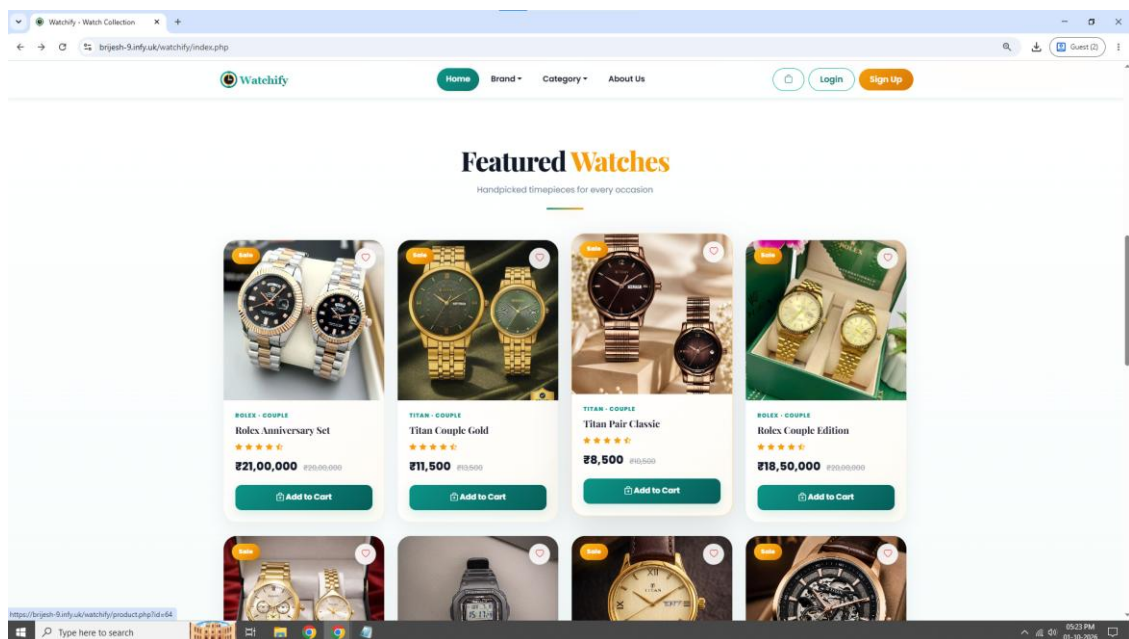

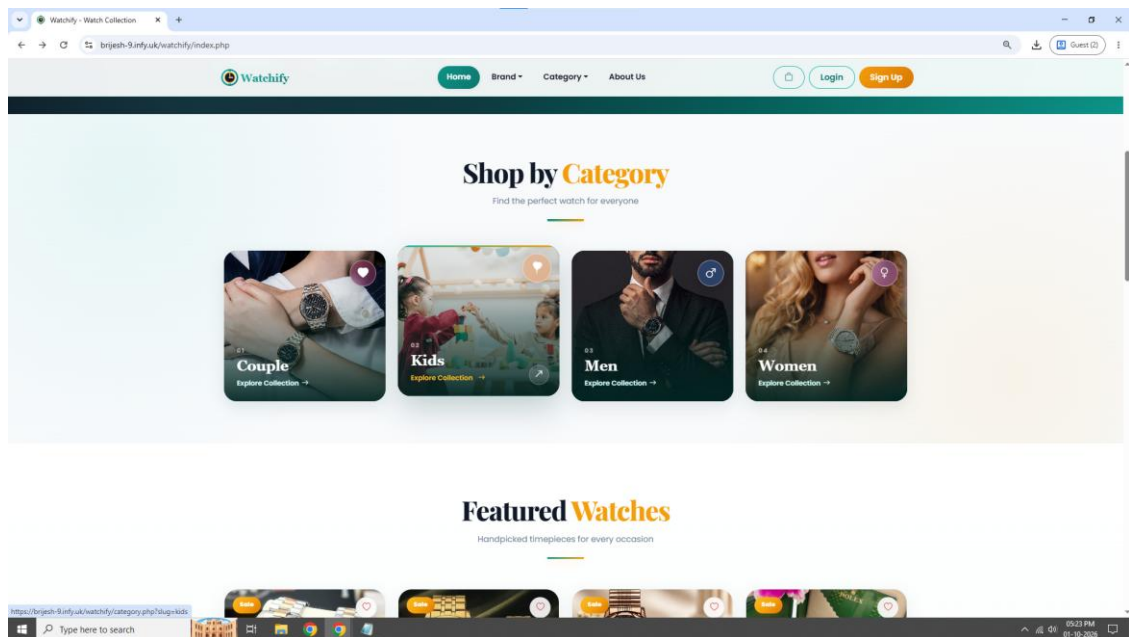

3 - Login Screen :

❖ Description :

- A registered customer login in using email and password.
- A customer can enter email and password then login your Account and open home page with profile .

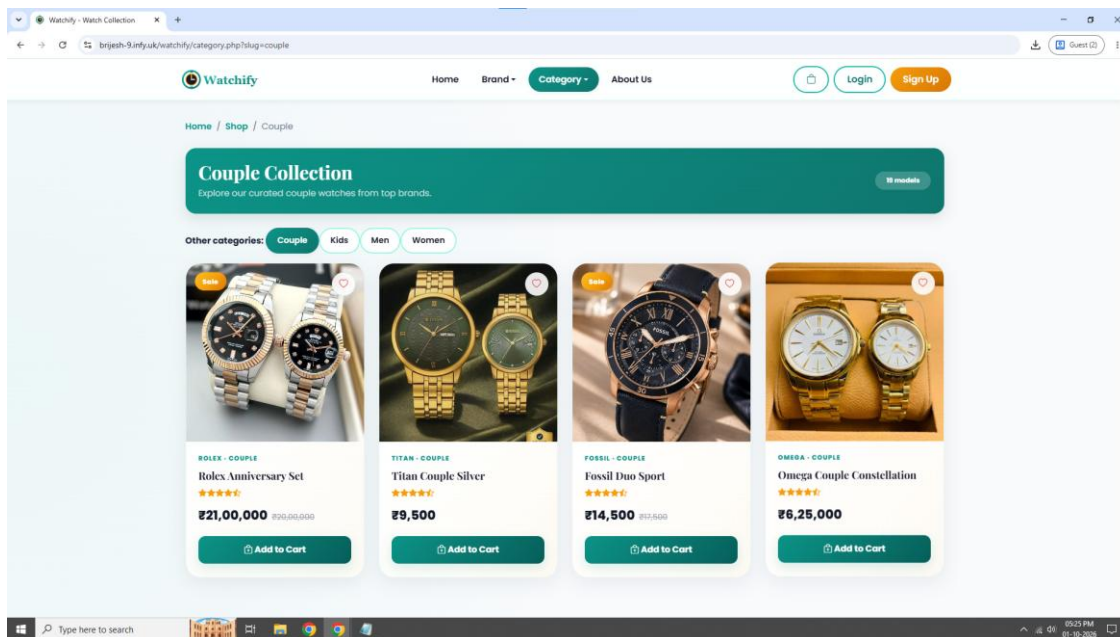

4 - Shop Screen :

❖ Description :

- Displays all active watches with a filter panel for search, brand, category and price range and a sort option.

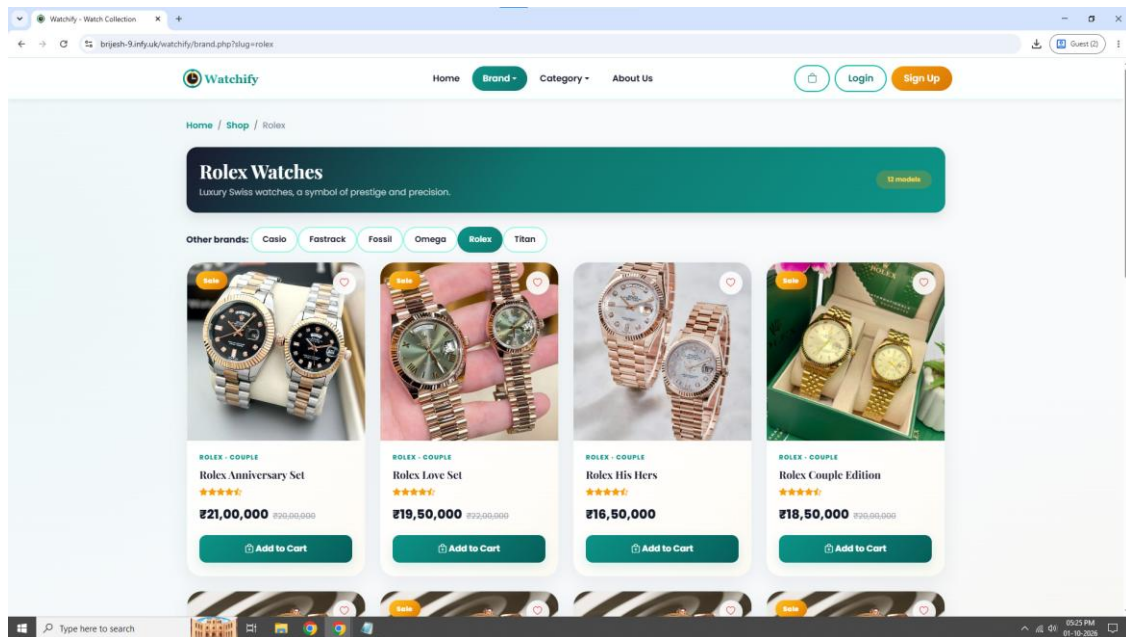

5 - Category Screen :

❖ Description :

- Displays watches of the selected category (Men, Women, Kids, Couple) or brand with the number of models.
- Choose category and select watch show watch information and price and other details .

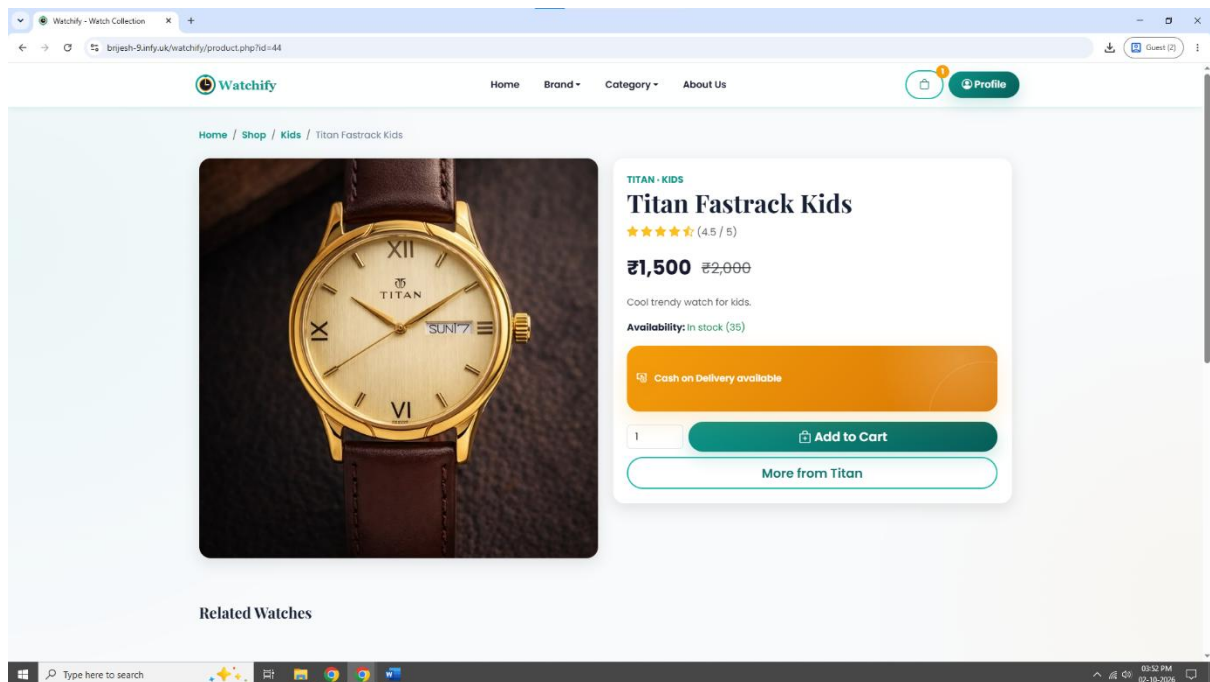

6 - Brand Screen :

❖ Description :

- Discover watches from trusted and stylish brands, carefully selected to match every personality and occasion.
- Branded watch with the number of models.

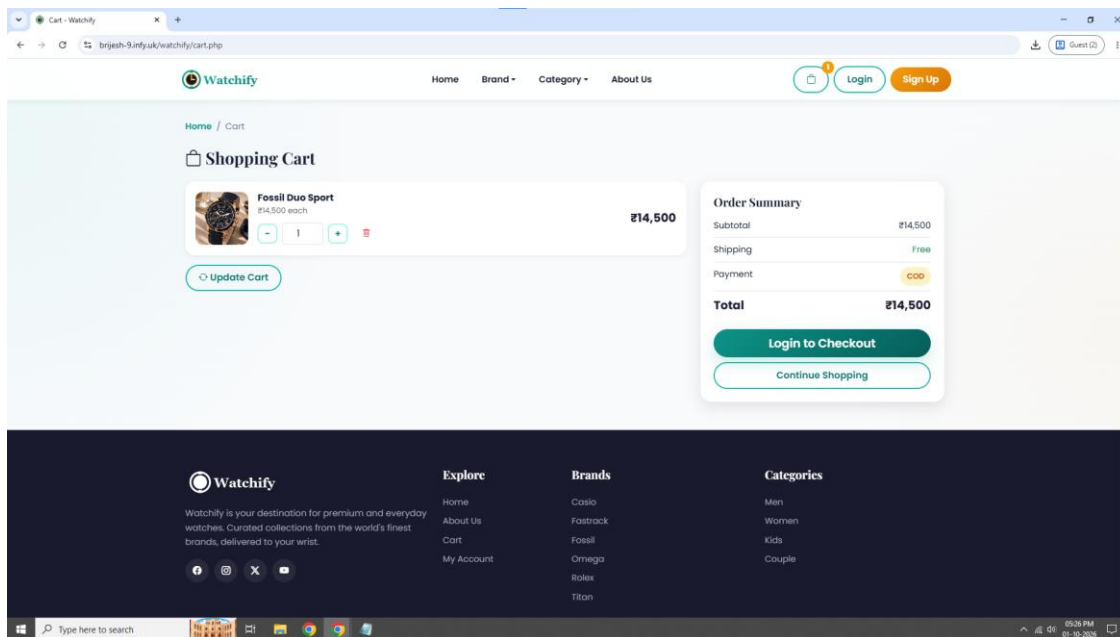

7 - Product Detail Screen :

❖ Description :

- Shows image, price, old price, description, stock status, quantity selector and related watches.
- The Add to Cart button is disabled when the product is out of stock.

8 - Cart Screen :

❖ Description :

- Lists every watch in the cart with quantity controls and remove button. The total amount updates instantly.
- Customer must log in to continue to checkout.

9 - Checkout Screen :

Checkout - Watchify

Cash on Delivery
Pay in cash when your order arrives at your doorstep. No online payment needed.

Place Order (COD)

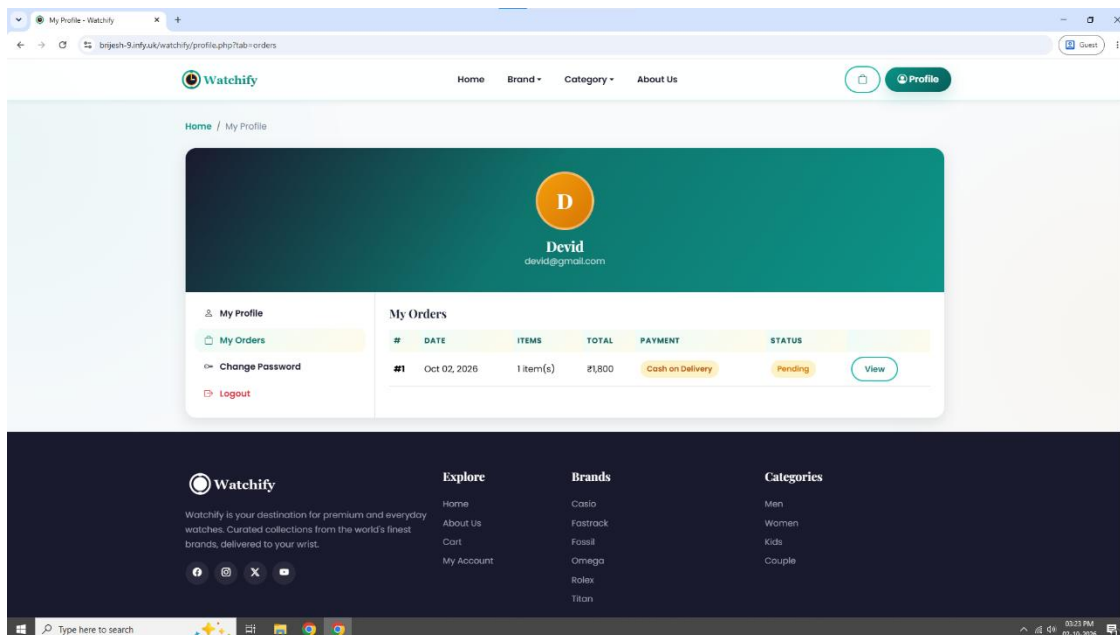

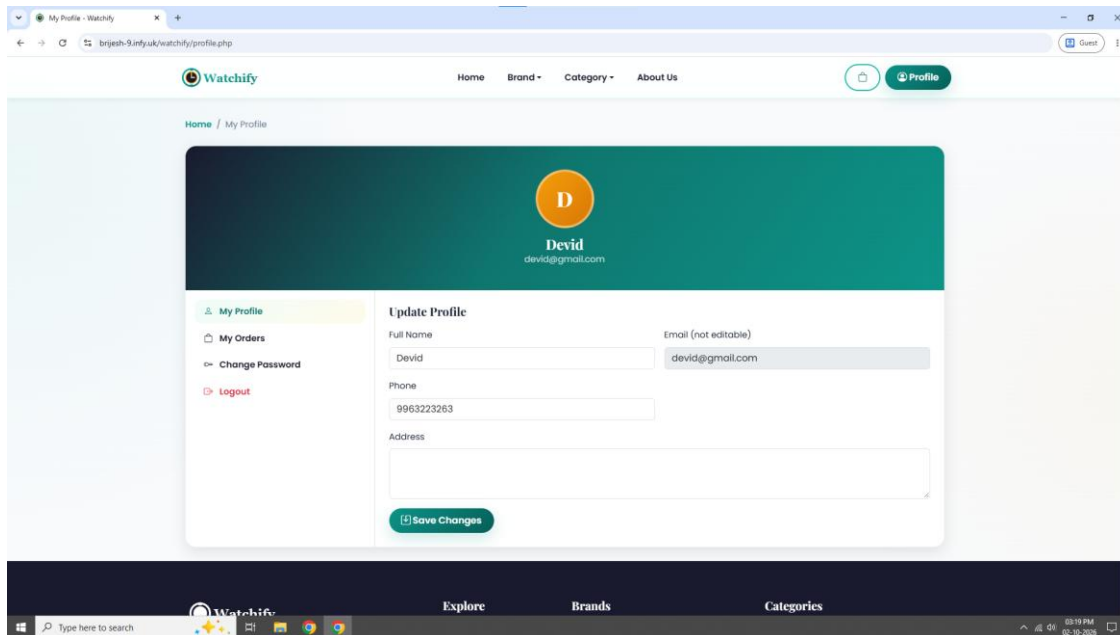

Your Items

	Titan Phoenix Skeletal Automatic Analog Qty: 1	₹1,800
Subtotal		₹1,800
Shipping		Free
Payment		Cash on Delivery
Total		₹1,800

❖ Description :

- Shows shipping details and order summary. Payment method is Cash on Delivery.
- Clicking Place Order saves the order and opens the order view page.

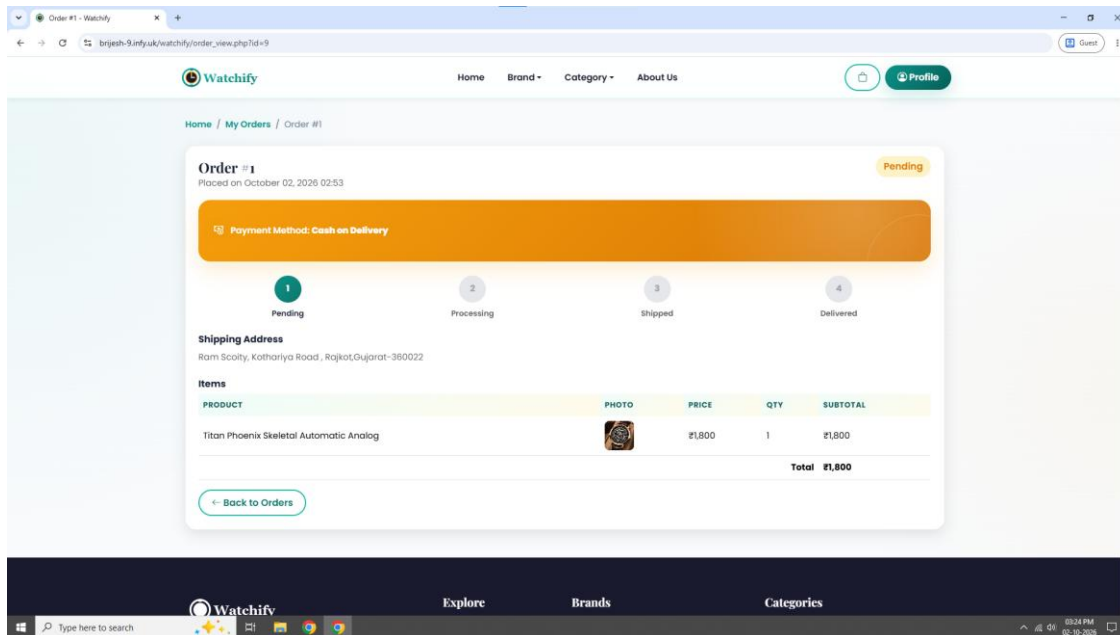

10 - Profile and My Orders Screen :

❖ Description :

- The customer can update personal details, change password and see all previous orders with their status.

11 - Order View Screen :

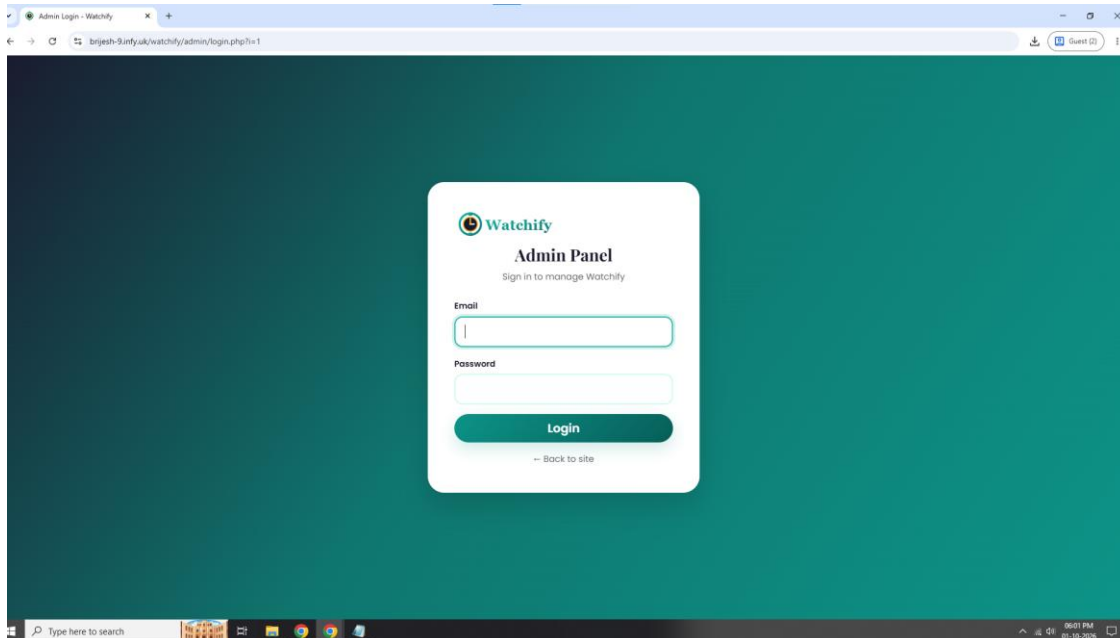

❖ Description :

- Shows items, shipping address, total and a progress tracker:
- Pending → Processing → Shipped → Delivered.
- Customer check the order status and updates

Admin Side Screens

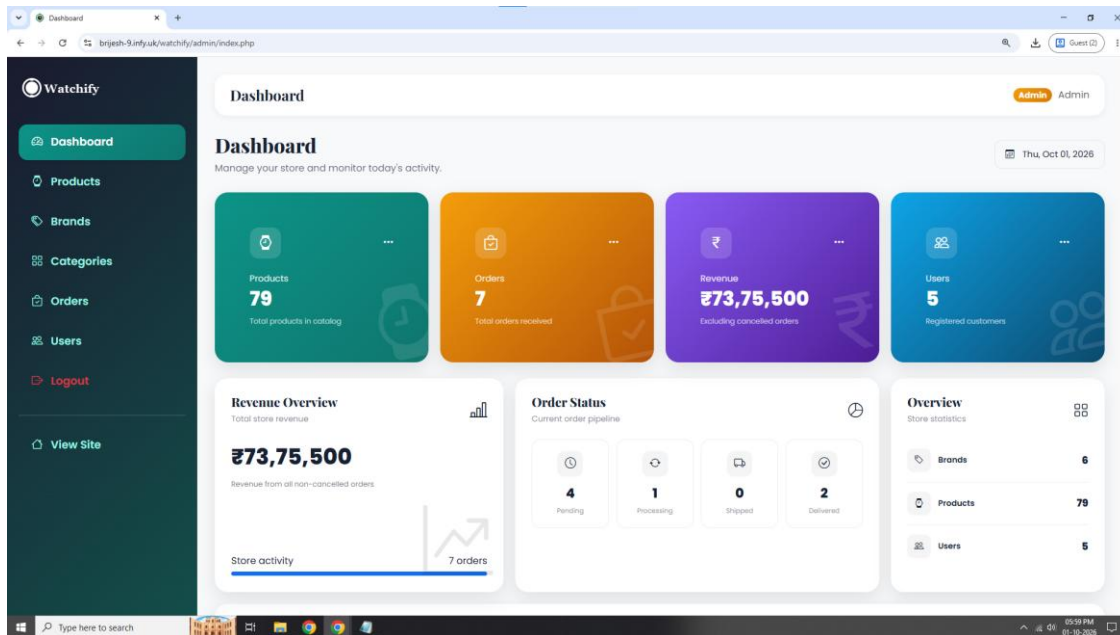

1 - Admin Login Screen :

❖ Description :

- If the email and password are correct, the admin can log in to the admin panel.

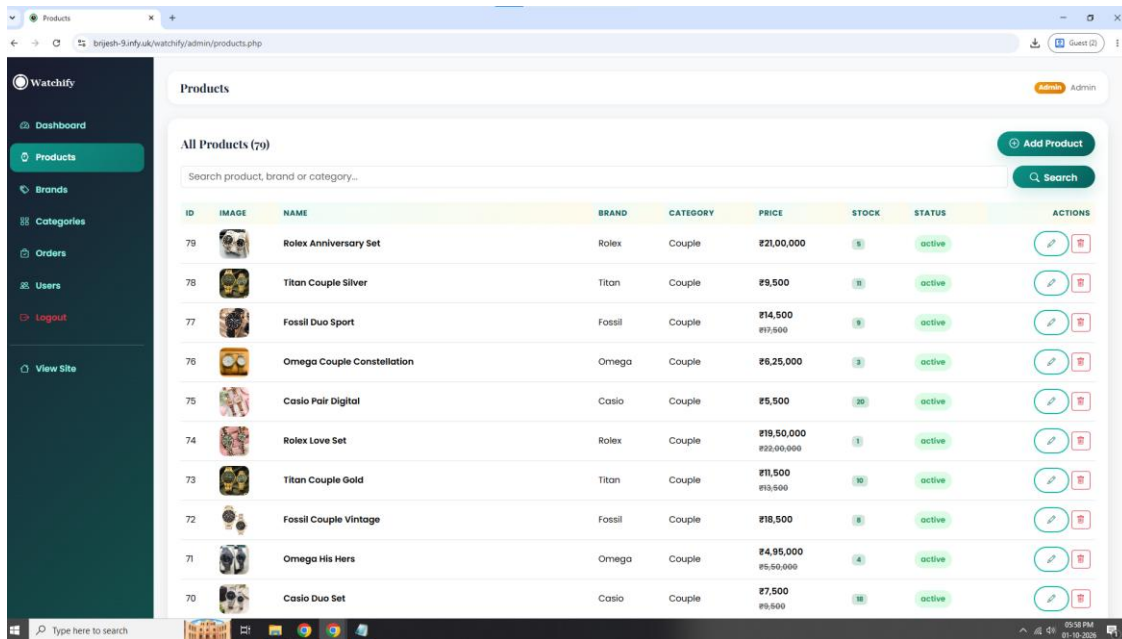

2 - Dashboard :

❖ Description :

- Shows total products, brands, orders, and users.
- Displays revenue and order status summary.
- Shows the latest/recent orders.

3 - Product Management Screen :

The screenshot shows the 'Products' management interface of the Watchify system. It features a sidebar with navigation links: Dashboard, Products (active), Brands, Categories, Orders, Users, Logout, and View Site. The main content area is titled 'Products' and shows 'All Products (79)'. A search bar is present with the placeholder text 'Search product, brand or category...'. Below the search bar is a table listing products. The table has columns for ID, IMAGE, NAME, BRAND, CATEGORY, PRICE, STOCK, STATUS, and ACTIONS. The products listed are Rolex Anniversary Set, Titan Couple Silver, Fossil Duo Sport, Omega Couple Constellation, Casio Pair Digital, Rolex Love Set, Titan Couple Gold, Fossil Couple Vintage, Omega His Hers, and Casio Duo Set. Each product row includes an edit icon (pencil) and a delete icon (trash can). The bottom of the screen shows a Windows taskbar with the search bar and several application icons.

ID	IMAGE	NAME	BRAND	CATEGORY	PRICE	STOCK	STATUS	ACTIONS
79		Rolex Anniversary Set	Rolex	Couple	₹21,00,000	5	active	 
78		Titan Couple Silver	Titan	Couple	₹9,500	10	active	 
77		Fossil Duo Sport	Fossil	Couple	₹14,500 ₹17,500	5	active	 
76		Omega Couple Constellation	Omega	Couple	₹6,25,000	3	active	 
75		Casio Pair Digital	Casio	Couple	₹5,500	25	active	 
74		Rolex Love Set	Rolex	Couple	₹19,50,000 ₹22,00,000	1	active	 
73		Titan Couple Gold	Titan	Couple	₹11,500 ₹13,500	30	active	 
72		Fossil Couple Vintage	Fossil	Couple	₹18,500	8	active	 
71		Omega His Hers	Omega	Couple	₹4,95,000 ₹5,50,000	4	active	 
70		Casio Duo Set	Casio	Couple	₹7,500 ₹9,500	15	active	 

❖ Description :

- The admin can add, edit and delete products.
- The admin can search products using brand , category, watch name and other keywords.

4 - Add / Edit Product Screen :

The screenshot shows the 'Add Product' form in the Watchify admin dashboard. The form is titled 'Add Product' and includes the following fields and options:

- Name:** A text input field.
- Stock:** A text input field with a value of '0' and a label 'Available quantity'.
- Brand:** A dropdown menu with 'Select Brand' as the placeholder.
- Category:** A dropdown menu with 'Select Category' as the placeholder.
- Price (₹):** A text input field.
- Old Price (₹) (optional):** A text input field.
- Product Image:** A section with a 'Choose File to Upload' button and a note 'JPG, PNG, GIF, WebP, SVG (max 5MB)'.
- Description:** A large text area.
- Status:** A dropdown menu with 'Active' selected.
- Featured product:** A checkbox.
- Buttons:** 'Save Product' and 'Cancel' buttons at the bottom.

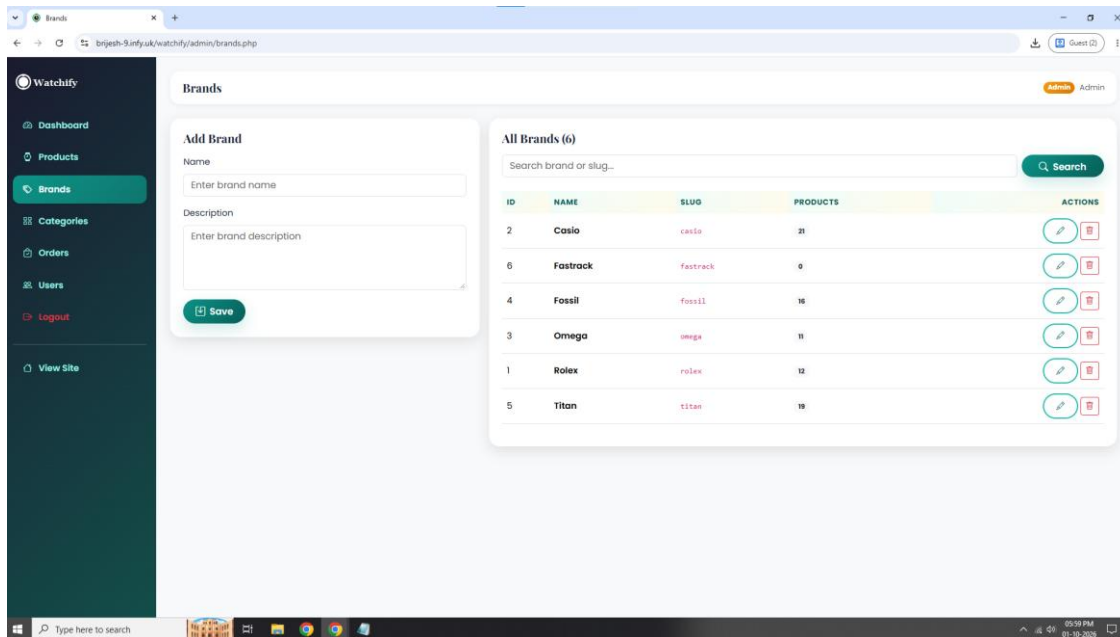

The screenshot shows the 'Edit Product' form in the Watchify admin dashboard. The form is titled 'Edit Product' and includes the following fields and options:

- Name:** A text input field with the value 'Titan Couple Silver'.
- Stock:** A text input field with a value of '11' and a label 'Available quantity'.
- Brand:** A dropdown menu with 'Titan' selected.
- Category:** A dropdown menu with 'Couple' selected.
- Price (₹):** A text input field with the value '9500.00'.
- Old Price (₹) (optional):** A text input field.
- Product Image:** A section with a 'Choose File to Upload' button and a note 'JPG, PNG, GIF, WebP, SVG (max 5MB)'. There is also a 'Current Image' preview showing a watch.
- Description:** A large text area with the value 'Silver tone couple pair.'.
- Status:** A dropdown menu with 'Active' selected.
- Featured product:** A checkbox.
- Buttons:** 'Save Product' and 'Cancel' buttons at the bottom.

❖ Description :

- Product name, brand, category, price, old price, description, stock, featured and status can be entered, and the image is uploaded with the "Choose File" button with preview.

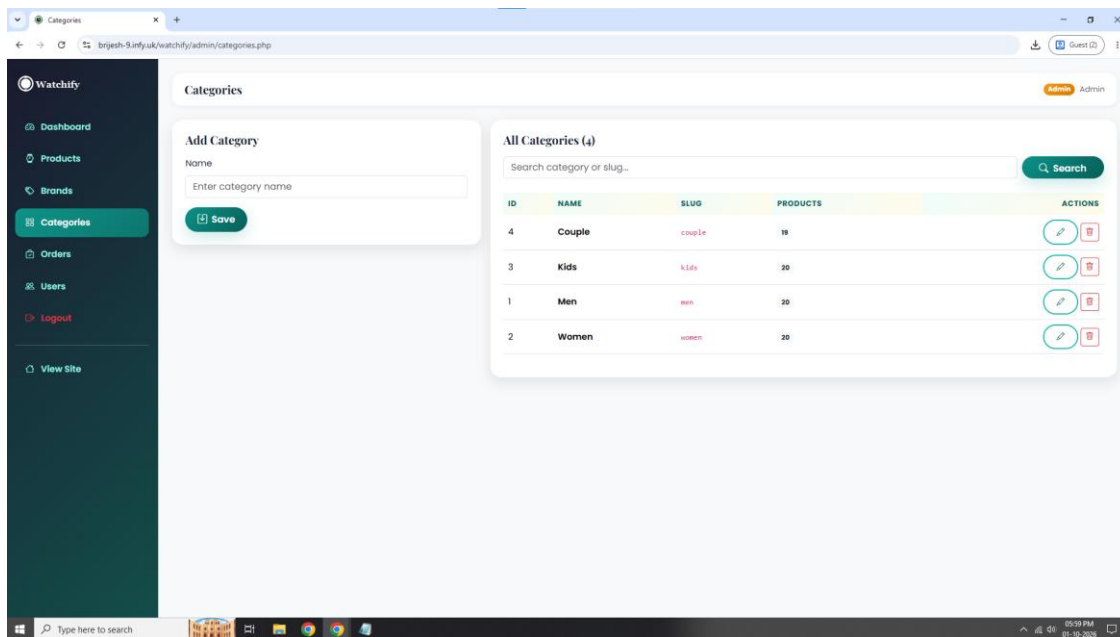

5 - Brand Management Screen :

❖ Description :

- The admin can add, edit, search and delete brands.
- The admin can search the brand .

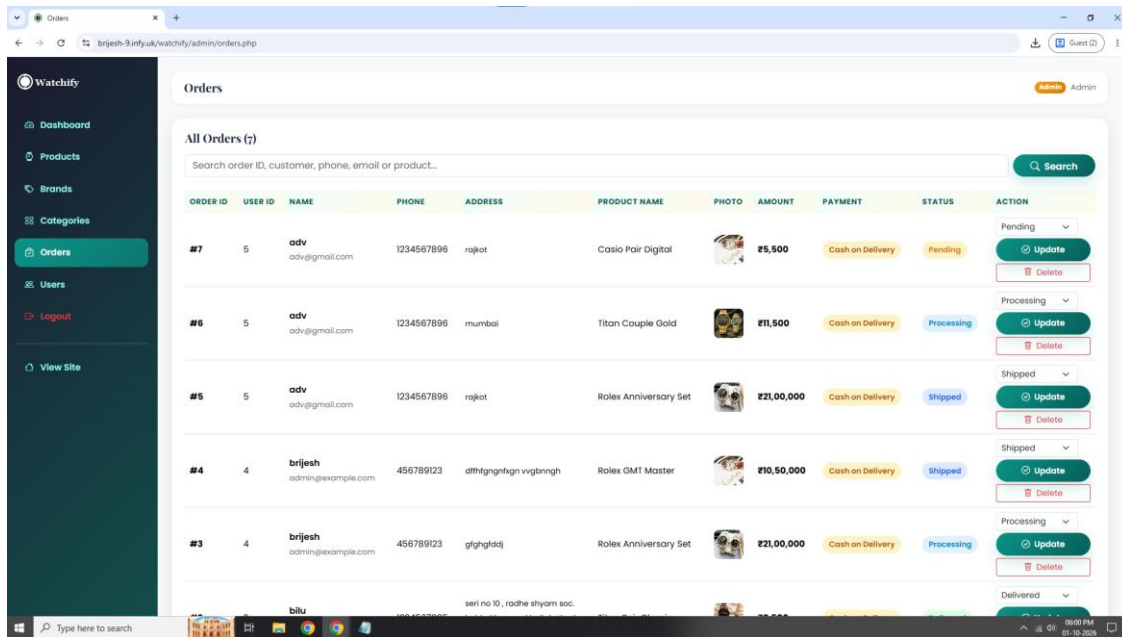

6 - Category Management Screen :

❖ Description :

- The admin can add, edit, search and delete categories.
- Admins can search the category.

7 - Order Management Screen :

Orders

All Orders (7)

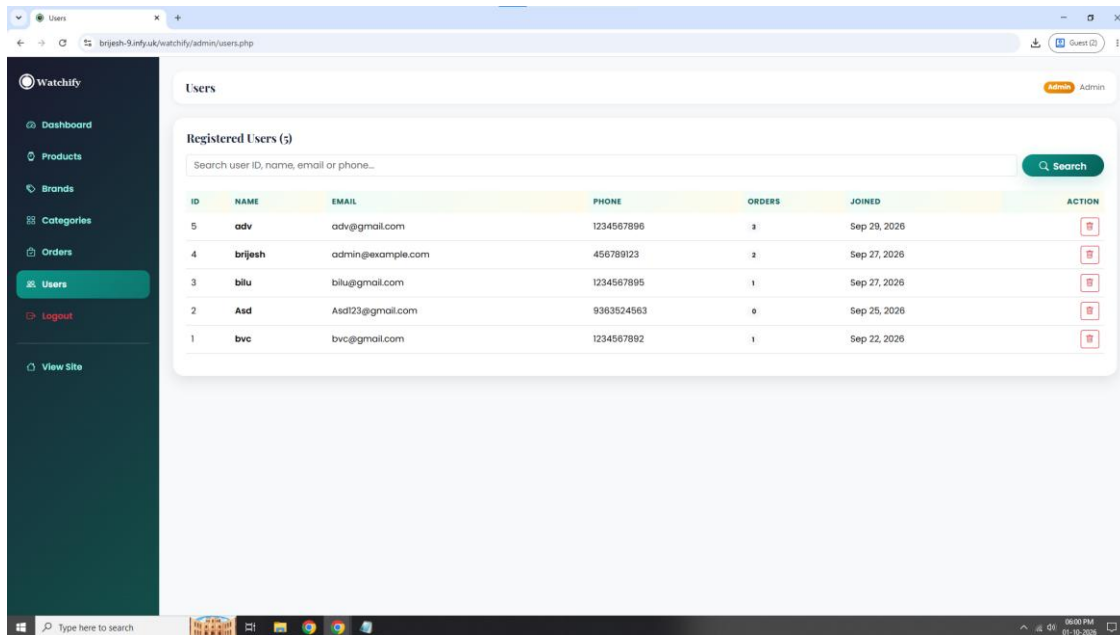

Search order ID, customer, phone, email or product...

ORDER ID	USER ID	NAME	PHONE	ADDRESS	PRODUCT NAME	PHOTO	AMOUNT	PAYMENT	STATUS	ACTION
#7	5	adv adv@gmail.com	1234567896	rajkot	Casio Pair Digital		₹5,500	Cash on Delivery	Pending	Pending Update Delete
#6	5	adv adv@gmail.com	1234567896	mumbai	Titan Couple Gold		₹11,500	Cash on Delivery	Processing	Processing Update Delete
#5	5	adv adv@gmail.com	1234567896	rajkot	Rolex Anniversary Set		₹21,00,000	Cash on Delivery	Shipped	Shipped Update Delete
#4	4	brijesh admin@example.com	456789123	atthtgnngnfgn vvgbnrgh	Rolex GMT Master		₹10,50,000	Cash on Delivery	Shipped	Shipped Update Delete
#3	4	brijesh admin@example.com	456789123	gfhghgladl	Rolex Anniversary Set		₹21,00,000	Cash on Delivery	Processing	Processing Update Delete
									Delivered	Delivered Update Delete

❖ Description :

- Shows all orders. The admin can search an order, change its status and delete it.
- When an order is marked Delivered, the stock of the products is reduced automatically.

8 - User Management Screen :

❖ Description :

- Shows all registered customers with their details and number of orders. The admin can search and delete a user.

Test Cases (User Side)

Test Case	Description	Actual Output	Test Result
Home Screen	Display hero banner, categories, featured watches and brands.	Display hero banner, categories, featured watches and brands.	Pass
Registration	New user can register with valid details; duplicate email is rejected.	New user can register with valid details; duplicate email is rejected.	Pass
Login	Valid email and password logs in; wrong details show an error.	Valid email and password logs in; wrong details show an error.	Pass
Shop Filters	Filter by brand, category, price and search; sort the list.	Filter by brand, category, price and search; sort the list.	Pass
Category / Brand Screen	Display all watches of the selected category or brand.	Display all watches of the selected category or brand.	Pass
Product Screen	Display product details, stock and related watches.	Display product details, stock and related watches.	Pass
Add to Cart	Watch is added to the cart with the selected quantity.	Watch is added to the cart with the selected quantity.	Pass
Cart Screen	Change quantity, remove item and total updates instantly.	Change quantity, remove item and total updates instantly.	Pass
Checkout	Order is placed with Cash on Delivery for a logged-in user.	Order is placed with Cash on Delivery for a logged-in user.	Pass
Profile	Update profile details and change password.	Update profile details and change password.	Pass
Order History / View	Display all orders and the status tracker of each order.	Display all orders and the status tracker of each order.	Pass

Test Cases (Admin Side)

Test Case	Description	Actual Output	Test Result
Login Screen	If the email and password are accurate, the admin can log in to the admin panel.	If the email and password are accurate, the admin can log in to the admin panel.	Pass
Dashboard Screen	Display totals, revenue, order status summary and recent orders.	Display totals, revenue, order status summary and recent orders.	Pass
Product Screen	The admin can add, update and delete products with image upload.	The admin can add, update and delete products with image upload.	Pass
Brand Screen	The admin can add, update and delete brands.	The admin can add, update and delete brands.	Pass
Category Screen	The admin can add, update and delete categories.	The admin can add, update and delete categories.	Pass
Order Screen	The admin can search orders, change status and delete an order; stock reduces on Delivered.	The admin can search orders, change status and delete an order; stock reduces on Delivered.	Pass
User Screen	The admin can view, search and delete users.	The admin can view, search and delete users.	Pass
Logout	Admin session ends and the login page is shown.	Admin session ends and the login page is shown.	Pass

Limitation

Though I tried my best in developing this system, limitations are a major part of any system, and so they are of this system. Some limitations of the Watchify website are as under :

- Only Cash on Delivery is available; there is no online payment gateway.
- No email or SMS notification is sent when an order is placed or its status changes.
- A customer cannot cancel an order; only the admin can change the order status.
- The shopping cart is stored in the session, so it is lost when the session expires.
- The wishlist (heart) button and the star ratings are only for display and do not store data.
- There is no "Forgot Password" option for customers and admin.
- All watches are shown on one page without pagination, and each product has only one image.
- Only one type of admin account is available.

Future Enhancement

To conclude, Watchify works as a complete watch shopping website in which customers can browse, order and track watches and the admin can manage the whole shop. To remove the above limitations, the following functionality can be added in the future :

- Online payment using UPI, cards and net banking (payment gateway).
- Email and SMS notifications for order confirmation and status updates.
- Working wishlist, product reviews and ratings.
- Forgot password with OTP / email link and email verification.
- Option for the customer to cancel an order and request a return.
- Pagination and multiple images for each product.
- Invoice (PDF) download, discount coupons and offers.
- Reports and charts for sales, and multiple admin roles.
- A mobile application for Android and iOS.
